

The District Department of the Environment and
Environmental Concern present:

Wetland Workshops for Educators

Wetland Plant ID: *Know 'em and Grow 'em!*

This course provides educators with an understanding of wetland plant ecology and adaptations, and the resources to identify plant species in the field. Materials will also cover native and non-native species and planting tips. Educators will gain valuable tools to increase students' interest in wetland plants, and inspiration to construct schoolyard wetland habitats.

Rain Gardens as Outdoor Classrooms!

This course introduces educators to the concept of rain gardens and their value as schoolyard habitats. Participants will understand how rain gardens benefit the environment by improving the watershed and how they can be used as an extension of the classroom. Participants will leave with the basic knowledge of how to plan, design and implement a rain garden from start to finish.

Course Information:

Wetland Plant ID for Educators!

October 13, 2012 9am - 4pm

\$35 includes course manual

Rain Gardens!

November 10, 2012 9am - 4pm

\$35 includes curriculum

Workshops are held at
The Aquatic Resources Education
Center, 1900 Anacostia Drive SE,
Washington, DC 20020

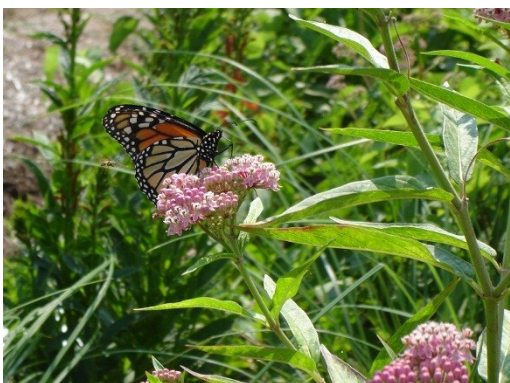

Space is limited. Please register at least 3 weeks in advance.
\$5 Discount when registering for both courses by Sept. 1st.

(Please call for discount.)
